

## our design process

### initial design consultation

The process starts with a complete understanding of your vision for this project. Our experienced design team takes the time to learn about your style preferences, what inspires you and how you want to feel in each space throughout your home.

We also discuss budget and timeline to create and execute a design plan that meets your family's needs. Our goal is to build a long-lasting, trusted relationship and exceed your expectations.

### proposal and contract

Based on our initial consultation, you will receive our Welcome Packet outlining the scope of your project, details on our design services, fee

structure, and other frequently asked questions to help guide you through this process.

### design

Our creative team will provide finish palettes and 2-D architectural drawings with elevations, furniture, and fixture selections using only the

highest quality materials. We collaborate with you to design an inspiring space that suits your personality and lifestyle.

### implementation

Our project management team ensures that deliveries are on track and all items for purchase are ordered and scheduled to match our installation timeline. For renovation projects, we work diligently with the contractor and team to

ensure that the design plan is well executed and within budget. Once your project is complete, we do a final walk-through to ensure everything has been completed to your satisfaction.
